HoudiniEsq

LogicBit Software Corp.
Research Triangle Park
North Carolina, USA

Soar above the Clouds

Web-based
Legal Practice Software

HoudiniEsq

Soar above your competition

HoudiniEsq is a cross-platform web-based legal case management product designed to grow with your practice. Access your data from just about anywhere on practically any device.

Expand your legal practice geographically while maintaining your data centrally.

Install it locally so your data stays in house at all times, but is accessible from anywhere, or signup for a SaaS account and leave the cost and the management of the hardware to us.

SaaS

Our data centers are SSAE16/SAS70 certified. Your data resides within U.S. borders on infrastructure we actually control.

A proven leader in functionality

HoudiniEsq runs in your web browser of choice but without any of the compromises or limitations found in all other web-accessible products.

Customize the product in minutes to fit one or more of your practice areas. Automate repetitive tasks with our workflow and document assembly automation features.

Unlike our competitors who view case management solely as a database where a law firm stores its data, we understand that case management is about so much more. To us, legal case management means streamlined workflow, improved client and staff communication, seamless tight integration, but above all else, **improved productivity.**

Key benefits

We provide one integrated suite of tools that streamlines workflow, increases productivity, helps you to provide better service, and build your practice. All with scalable web-accessibility at its core.

100% turnkey and 100% web-accessible. Nothing more to buy - No Database, No App Server, No CITRIX Server, No Web Server, No Exchange Server, and no expensive hardware is required.

We are the authority

HoudiniEsq was developed by the Architect of the award winning Time Matters™ World Server™. In 2000 World Server was the first 100% cross-platform web-based legal practice management system in existence. That is over 10 years before the phrase “Cloud Computing” entered our lexicon.

We set the bar

A proven scalable system vetted by over 6,500 independent law firms and state agencies.

The most cost effective way to manage your practice from anywhere. Increase productivity, provide better service, start building your legal practice today.

Your competitors are using HoudiniEsq, why aren't you?
